# NOT ENOUGH PEOPLE ARE DONATING BLOOD

Only you can help us fill the missing types.

When the letters A, B and O vanish from everyday life, the gaps are striking. And when A, B and O blood types are missing from hospital shelves, patients cannot receive the lifesaving care they need.

We take for granted that blood will be available at a moment's notice. Missing blood types can delay surgeries and critical care for patients in need.

This summer, what if A, B and O blood types weren't available? Don't let this scenario become a reality for you or someone you love. [Schedule an appointment to donate blood today.](#)

Only **3** out of **100** people donate blood in the U.S.

Blood types typically go missing during the **summer**.

Every **two seconds**, someone needs blood.
